EIN GEDICHT IN BILDERN

Die Welt der B's

Die B's sind eine rein zweidimensionale Spezies mit nur einem Bein. Ob und wie sie sich fortbewegen, ist nicht bekannt. Ihren großen Füßen zum Trotz hat es den Anschein, als würden sie immerzu an einer Stelle verharren. Manche Leute glauben, die B's seien Würmer. Aber das stimmt natürlich nicht - sie haben nur keine Arme.

Einen Mund haben die B's auch nicht. Brauchen sie auch nicht. Weil es in ihrer Welt nichts zu sagen gibt. Und weil sie sich nur von Wasser ernähren - durch die Haut. Wenn sie besonders durstig sind, können sie sogar Wurzeln schlagen. Das ist aber nur selten nötig, weil ihnen das Wasser sowieso meistens bis zum Hals steht.

Wer das Leben der B's erforschen will, sollte nicht darüber nachdenken. Man kann sie nicht verstehen, sondern nur fühlen - und so vielleicht das Eine oder Andere aus ihrer fremden und seltsamen Welt erahnen.

The world of the B's

The B's are a pure twodimensional species with only one leg. When and how they move about is not known. Even with their big foot it appears as if they persist on the same spot. Yet Some people believe the B's to be worms. That however is utterly untrue – they simply lack arms.

A mouth is also lacking the B's. And they do not need one either. Because there is nothing to be said in their world. And because they nourish themselves of water – through their skin. In case of great thirst they are even able to grow roots. That however happens very rarely as the water is most of the time up to their neck.

He who investigates the life of the B's should not reflect on it. You cannot comprehend but only feel them – and thus gain a glimpse of sense of their strange and mysterious world.
